INTELLIGENCE 22 CLASSIFICATION ~~SECRET/CONTROL - U.S. OFFICIALS ONLY~~ 25X1A

CENTRAL INTELLIGENCE AGENCY REPORT NO. [redacted]

INFORMATION REPORT CD NO.

COUNTRY Germany (Russian Zone) DATE DISTR. 21 September 1951

SUBJECT Jenapharm 25X1C

REFERENCE COPY

DO NOT CIRCULATE

NO. OF PAGES 1

PLACE ACQUIRED [redacted] 25X1A

NO. OF ENCLS. (LISTED BELOW)

DATE OF INFO. [redacted] 25X1X

SUPPLEMENT TO REPORT NO.

[redacted]

1. All the adrenalin needed by the Jenapharm Plant in Jena (... 51/J 6?), is imported by Ciba in Basel, Switzerland. The production of adrenalin in the Jenapharm Plant is still in the initial stage and has not yet been released to the trade because it consists partly of racemate (Racemat). *

2. In May 1951 the isotonic (sic) production of the Jenapharm Plant was approximately two thousand 100-cubic cm ampules comprising 90 ampules of charge (sic) 55123; 210 ampules of charge 55122; 199 ampules of charge 55114, and 220 ampules of charge 55111. The remaining charges were not known by source. ** acid

3. In May 1951 the Jenapharm Plant produced 5,058 ten-cubic cm ampules of physiological sodium chloride solutions of charge L5169; 33,600 two-cubic cm ampules of 1 percent Jenacain (procaine) with 0.005 percent adrenalin of charge L51[illegible] packaged in 336 containers of 100 ampules each; and 32,300 two-cubic cm ampules of Jenacain with 0.005 percent adrenalin of charge L5173 packaged in [illegible] containers of 100 ampules each.

4. In May 1951 the Jenapharm Plant also produced 13,110 one-cubic cm ampules of one percent morphine hydrochloricum with 0.0003 grams of scopolamine hydrobromicum of charge [illegible], packed in 87 packages of 50 ampules each, and 876 packages of ten ampules each; and 11,920 one-cubic cm ampules of two percent morphine hydrochloricum with 0.0005 gram of scopolamine hydrobromicum of charge 55120. In April 1951 this plant produced 2.25 kg of crystalline as vitamin B2.

25X1A

[redacted] Comment. Racemate are molecular compounds of substances with different optical activities.

25X1A [redacted] Comment. The isotonic production of the Jenapharm Plant is the production of solutions with the same osmotic pressure as in living cells.
